

MEDIA CONVERTER

DUALFOCONV

Datasheet

THE STINGER DUALFOCONV MEDIA CONVERTER

1. GENERAL

The BS019 is a double loop media converter, suitable for multimode fiber optic cable.

2. KEY FEATURES

1. This double loop arrangement makes it possible to implement a daisy chain communication system between several energizers around a perimeter. The double action ensures communication to all devices, even if the F.O. cable is broken between two devices.
2. RS485 and RS232 input/output.
3. Can be used with the BS102, BS104 and the BS120 Energizer
4. Baud rate 1200 and 2400 Baud

3. SPECIFICATIONS

Power input	11 to 24V at 40mA
F.O. Connectors	Suitable for Multimode cable with ST Ceramic connector
